Senior Full-Stack Software Engineer with over 9 years of experience building scalable SaaS platforms and modern web applications. I've spent most of my career working with React, Next.js, and TypeScript on the frontend, along with Node.js, NestJS, and Laravel on the backend.

In my current role, I work across the full stack, helping design and evolve systems that run in AWS environments. My focus has been on improving performance, scalability, and developer experience, while contributing to architectural decisions and supporting the team through code reviews and collaboration.

I'm comfortable working in Agile environments and enjoy solving real-world problems, especially in products that impact users at scale.

Academic Summary:

- **Bachelor 's Degree in Internet Systems** – Fatec São Roque.
- **Technical Degree in Information Technology** – Centro Paula Souza Etec São Roque.

Certifications & Courses:

- TOEFL ITP (Test of English as a Foreign Language) – ETS.
- Claude 101 – Anthropic.
- Claude Code in Action – Anthropic.
- Communication & Active Listening – LinkedIn Learning.

Tech Stack / Skills:

- **Programming Languages:** JavaScript, TypeScript, PHP, SQL.
- **Frameworks / Libraries:** React, Next.js, Node.js, NestJS, Laravel, React Native, Apollo (GraphQL).
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite, DynamoDB (*familiar*).
- **Cloud:** AWS (CloudWatch, CI/CD pipelines, Lambda and API Gateway), Docker.
- **Testing / QA:** Unit testing, component testing, automation (Jest, React Testing Library, Vitest).
- **Others:** Microservices, micro frontends, distributed systems, REST and GraphQL APIs, WebSockets, Agile/Scrum (full SDLC), Linux/Unix environments, CI/CD practices, code reviews, system design (scalability, performance, fault tolerance), **data structures and algorithms, complexity analysis**, Git, GitHub, GitLab, AI-assisted development.

Work Summary:

Escala

Role: Senior Software Engineer

Dates: 01 May 2022 to Present.

Technologies: ReactJS, NextJS, TypeScript, Tailwind CSS, styled-components, AWS, NestJS, PHP (Laravel), MySQL, CI/CD Pipelines.

Outline: Working on a SaaS platform that started in the healthcare space (ICU monitoring) and later expanded to large enterprise clients.

Responsibilities:

- Led the development of key parts of the platform, now used by clients such as Albert Einstein Hospital and other large enterprise companies.
- Helped redesign the frontend using React and Next.js, making the codebase easier to maintain and scale.
- Worked on backend services using NestJS, building REST and GraphQL APIs to support dashboards and real-time data.
- Took part in architectural decisions, especially around API design and data flow between services.
- Integrated micro frontends with AWS-based CI/CD pipelines, improving deployment reliability.
- Worked daily within AWS environments, using monitoring, logging, and CI/CD pipelines to support scalable applications.
- Worked with serverless patterns (Lambda, API Gateway) and understood how they fit into scalable architectures.
- Improved data fetching and performance by adopting GraphQL across frontend and backend.
- Participated in code reviews and supported other developers on the team.
- Diagnosed and resolved critical production issues across application, database, and infrastructure layers.
- Worked with distributed systems and asynchronous data flows to support scalable services.

Hotmart

Role: Front-End Web Developer

Dates: 01 Sep 2021 to 01 May 2022.

Technologies: React, TypeScript, Jest, Storybook, styled-components.

Outline: Improved platform security, performance, and global user experience through front-end enhancements.

Responsibilities:

- Built and improved frontend components used by a global user base.
- Worked on accessibility and responsiveness across different regions and devices.
- Contributed to improving platform security through bug fixes and enhancements (~15% improvement).
- Improved frontend security by applying input validation and sanitization techniques.
- Added tracking events and tools like Hotjar to improve analytics and user behavior insights.
- Followed best practices in React and TypeScript to keep the codebase maintainable.
- Collaborated closely with product, QA, and other developers in an Agile environment.

FDTE

Role: Full-Stack Web Developer

Dates: 01 Sep 2019 to 01 Sep 2021.

Technologies: ReactJS, NodeJS, Express, React Native, AWS.

Outline: Delivered full-stack and mobile solutions that improved performance and increased client revenue.

Responsibilities:

- Developed full-stack applications using React on the front end and Node.js/Express on the back end.
- Performed extensive refactoring to modernize legacy codebases.
- Fixed critical bugs and improved system performance.
- Contributed to a 20% revenue increase through new product features.
- Ensured maintainability and scalability of delivered solutions.
- Developed and maintained GraphQL APIs using Apollo Server.
- Helped migrate REST APIs to GraphQL, improving frontend integration and reducing unnecessary data fetching.
- Developed mobile applications using React Native for cross-platform delivery.
- Collaborated directly with clients to understand requirements and deliver solutions.

Atitude Digital Media

Role: Web Developer (Mid-Level)

Dates: 01 Sep 2017 to 01 Sep 2019 .

Technologies: ReactJS, PHP, Bootstrap, WebRTC, Materialize, Sass, AWS, Jenkins.

Outline: Developed video platforms and dashboards while significantly improving test coverage and performance, mainly in the healthcare space.

Responsibilities:

- Built an admin dashboard for managing web meetings with real-time streaming (WebRTC).
- Helped improve performance and load times of a video platform.
- Delivered custom web solutions for healthcare clients.
- Implemented WebRTC-based real-time features.
- Improved application load times and overall performance.
- Increased automated test coverage from 0% to 100%.
- Collaborated with teams to enhance code quality and maintainability.
- Worked on an e-learning course platform.

Novacia

Role: Web Assistant

Dates: 01 May 2016 to 01 Sep 2017.

Technologies: HTML, CSS, Email Marketing Tools, PHP, Bootstrap.

Outline: Supported marketing and internal systems, helped in developing internal tools, and a digital magazine for Itaú Banking.

Responsibilities:

- Helped build responsive email campaigns for clients like Itaú.
- Worked with major clients such as banking and educational institutions.
- Maintained and updated internal systems.
- Ensured cross-platform compatibility for email templates and digital magazines.
- Collaborated with design and marketing teams.

Languages

- **English:** Full Professional Proficiency.
- **Portuguese:** Native.
